PROFESSIONAL SUMMARY

Software Engineering student at Uncommon.org with hands-on experience building web applications and business websites using React, JavaScript, HTML, CSS, and modern full-stack technologies. Built individual and team projects including productivity applications, business websites, a travel and tours website, and an e-commerce application with a Next.js frontend and Express.js backend. Developing practical skills in responsive design, component-based development, backend APIs, problem-solving, debugging, teamwork, and full-stack web development.

EDUCATION

Uncommon.org — Software Engineering

Expected Graduation: December 2026

O-Level — 2024

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Django

Tools: Git, GitHub, VS Code, Vite, npm

PROJECTS

Todo App

React | JavaScript

- Built a task-management application that allows users to create, manage, complete, and organize todo items.
- Used React components and JavaScript to create an interactive user experience.
- Practiced component-based development and managing application state.

Expense Tracker

HTML | CSS | JavaScript

- Developed a browser-based expense tracker for recording and managing personal expenses.
- Created an interactive interface using HTML, CSS, and JavaScript.
- Practiced working with user input, dynamic page updates, and basic expense calculations.

Jumpstart Website

React

- Built a React-based website as part of practical front-end development work.
- Developed reusable interface components and responsive page layouts.
- Practiced structuring a React project and creating a user-friendly web experience.

African Coast Travel and Tours Website

React | JavaScript | CSS

- Developed a travel and tours website designed to present destinations, tours, and travel information.
- Created responsive sections and user-facing interfaces to help visitors explore travel options.
- Practiced building a business-focused website with clear navigation and presentation of services.

Flames Order Page — Team Project

Team Collaboration | Web Development

- Collaborated as part of a team to develop an order page for Flames.
- Contributed to project development, communication, problem-solving, and sharing technical ideas with teammates.
- Practiced working with others to divide tasks and complete a shared software-development project.

E-Commerce Website — Full-Stack Project

Next.js | Express.js | Frontend + Backend

- Developed an e-commerce website with a separate frontend and backend architecture.
- Built the frontend using Next.js to create the customer-facing shopping experience.
- Built the backend using Express.js to provide server-side functionality and API endpoints.
- Practiced full-stack development by connecting the frontend with the backend.

CORE STRENGTHS

Problem Solving | Debugging | Teamwork and Collaboration | Communication | Fast Learning | Time Management | Independent Working | Creativity

PROFESSIONAL INTERESTS

Web Development | Software Development | Front-End Development | Full-Stack Development | E-Commerce Applications
